

# Miniature Zinc Casting

## Executive Summary

The Company produces miniature zinc die castings with weights up to 80 grams (2.8 ounces) with a precision to 0.01mm (.0004 inches) and conventional up to 1Kg. They have 2 conventional diecasting machines (50 tons and 160 tons) and operate 18 die casting machines, four of their own design to maximize productivity and quality. They have the capability of producing 500,000 shots per day. The Company is ISO 9001:2008 certified and operates to TS16949 standards. The development of molds and machines is internally using CAD 3D FEM. The Company was established in 1985. The Company is in an industrial area of Italy. It is well located to ship casting world-wide. The tool room and test room are equipped with modern CNC and fuzzy logic machines.

## Markets

The Company produces parts for locks, windshield wipers, mirrors, carburetors, fuel injection systems, thermostats, timers, coffee machines, electric razors, valve bodies, electronic connectors, furniture and many other end items. Markets include automotive and transport, consumer electronics, furniture hardware, telecommunications, hydraulic and pneumatic, buildings and windows, electrical components, and fashion items.

## Diecasting

The Company operates 2 conventional diecasting machines (50 tons and 160 tons) and 18 miniature zinc die casting machines. They have machines internally designed and built internally to provide improved performance, dies are according Dynacast/Techmire standard sizes. The Company machines are faster (up to 50 cycles per minute), more precise, simpler design allowing better reliability with less maintenance, provide better repeatability, allow for more complex shapes, built with the specific part requirements in mind and are more economical for the customer with better margins for the Company.

## Facilities

The Company operates from about 2,000 square meters (22,000 square feet) of modern industrial buildings. The buildings are in an industrial park in Northern Italy. This is a heavily industrialized area with full and ready access to additional services as required. Infrastructure is excellent with enough power availability to support additional equipment.

## Financial

Sales in 2018 were €3.4 million with EBIT of €318,000.
